The diagram illustrates a tree structure on a light green background. At the top, a light blue rectangular node contains a colon (:), with a horizontal line below it and an exclamation mark (!) centered underneath. To the right, three more light blue rectangular nodes are arranged vertically, each containing a colon (:). These are connected to the main structure by horizontal lines. Below these, a light blue rectangular node contains a colon (:), with a red horizontal line below it. The diagram is filled with various symbols: double dots (..) are scattered throughout; parentheses () appear in several places; and a colon (:) is located at the bottom right. At the bottom center, the number (1) is displayed. The overall structure suggests a hierarchical or branching process.
